Dates	01/06/2011 – 1/09/2011(3 months)
Occupation or position held	Silverlight developer, (internship)

Independent Projects:

Name of project	DB Tool
Technology	Xamarin, .NET, MVC5, MSSQL, Restful API
About	DB Tool is a small application that allows you to make simple queries in your databases. For now, it only supports MSSQL and MySQL databases, and you can only make a select query, I hope that in the future I'll extend this. This application is developed for Android, iOS, and Windows Phone. For now, it is completely free of charge because it is a pet project, not a commercial one. If you have any question or suggestion please feel free to contact me.

iOS App	https://itunes.apple.com/us/app/db-tool/id1266413053?ls=1&mt=8
Android App	https://play.google.com/store/apps/details?id=com.kostoski.xamarin.databasetool
Windows App	https://www.microsoft.com/en-mk/store/p/db-tools/9nzwdqf36s95?rtc=1
Name of project	PRTR Macedonia (2016)
Technology	ASP .NET, MVC5, MSSQL and PostgreSQL
About	This is an extension of the previous project (PRTR Macedonia 2013). After using the old web application for three years, the Macedonian Ministry of Environment and Physical Planning developed a need for new features and tools in the web application.
URL	http://ripz.moepp.gov.mk/
Name of project	SmartPhonebook WindowsPhone (2nd place on MIO contest) 2015
Technology	WINDOWS PHONE (ASP .NET)
About	SmartPhonebook application was awarded as second place in contest organized by Ministry of information society and administration Macedonia. The main goal of the contest was to be created application that will use open data from Macedonian institutions. SmartPhonebook is using data from AEK (Agency for Electronic Communications).
Name of project	MyBudgetPlanner (Microsoft AppStar winner 2014).
Technology	WINDOWS PHONE (ASP .NET)

About	<p>MyBudgetPlanner is application which allows you total control of your expenses and budget. This application offers you a detailed report about your daily and monthly spending's. Also you can see history of your spending's by months.</p> <p>The idea of this application is to help you plan your own budget, in other words, using charts and percent's you can track on what kind of things you're spending your money, and on what kind of things you can save your money. Here you can see on which category of expenses you're spend most of your money, also you can see from which account you spend most, is that your personal debit card or cash. This application provides you detail report about your current financial status. You can see your current status, current status by accounts, total spend amount, total save amount and total left amount in your budget.</p> <p>You can add as many as you want categories of expenses and accounts (support debit and credit account). Beside the standard expense entry record, you can choose if that expense will ocurre in the future (every day, work days, weekends, every month or year). Also, there is an option to add funds and transfer found between accounts. There is a security option, which means that you can protect this applications with PIN, so nobody else can open it without PIN, you can also change or delete the PIN.</p> <p>At this point, application supports only English and Macedonian language, but in near future we plan to add support for other languages.</p> <p>*Fully Metro style.</p>

Name of project	PRTR Macedonia (2013)
Technology	ASP .NET, MSSQL and PostgreSQL
About	<p>This project was sponsored by European union with cooperation with Macedonian Ministry of Environment and Physical Planning. I was hired as an export who will make web site where will be integrated their existing PostgreSQL database, so the visitors will be able to see the details about the pollution and polluters in Macedonia. About the technology, the web has been developed using Microsoft .NET technologies and MSSQL type of database, also has been established integration with the existing PostgreSQL database of the BUBE software.</p>
